DANT CLAYTON

BLEACHER MAINTENANCE CODE REQUIREMENT INFORMATION

To: Facility Manager,

You have purchased a quality Dant Clayton product and like any other product that gets use, annual inspections and maintenance will be required to keep your patrons safe and keep your investment in good condition. As your bleachers age and standards change over the years, it is important to keep your bleachers suitable for occupancy. There are accidents each year due to outdated or non-conformance bleachers. At the end of your warranty period, we are offering a thorough inspection of your bleacher on a yearly basis along with the capability of providing the necessary material and qualified labor to address any issues that are found.

This inspection will satisfy the <u>IBC building code ICC 300-2007 section 105.2 which</u> requires the bleachers are inspected and tagged on a yearly basis to be maintained by <u>manufacturer's standards</u>. It will also provide documentation which can be submitted to your liability insurance provider that the facility is being maintained in a safe and professional manner.

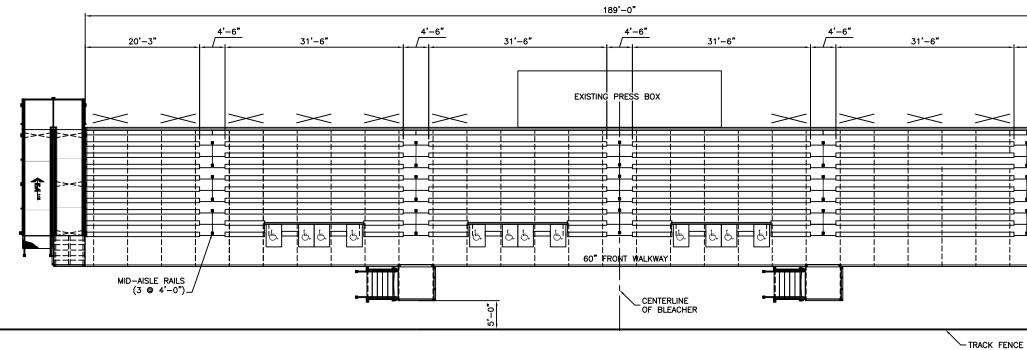

The yearly inspection, performed by Dant Clayton certified inspectors, will report on all observations made during the inspection and what actions and costs are recommended to ensure the general safety and wellbeing of your occupants.

The cost of the inspections is minimal compared to the value savings long term. The pricing will be clearly defined and acceptable prior to inspection. Please ask about our five-year agreements which save you 20% over the term of agreement.

Upon expiration of your warranty period, if you are interested and would like to take advantage of this proven program and set up an inspection, or would like more information please contact:

DANT CLAYTON

BLEACHER MAINTENANCE CODE REQUIREMENT INFORMATION

To: Facility Manager,

You have purchased a quality Dant Clayton product and like any other product that gets use, annual inspections and maintenance will be required to keep your patrons safe and keep your investment in good condition. As your bleachers age and standards change over the years, it is important to keep your bleachers suitable for occupancy. There are accidents each year due to outdated or non-conformance bleachers. At the end of your warranty period, we are offering a thorough inspection of your bleacher on a yearly basis along with the capability of providing the necessary material and qualified labor to address any issues that are found.

This inspection will satisfy the <u>IBC building code ICC 300-2007 section 105.2 which</u> requires the bleachers are inspected and tagged on a yearly basis to be maintained by <u>manufacturer's standards</u>. It will also provide documentation which can be submitted to your liability insurance provider that the facility is being maintained in a safe and professional manner.

The yearly inspection, performed by Dant Clayton certified inspectors, will report on all observations made during the inspection and what actions and costs are recommended to ensure the general safety and wellbeing of your occupants.

The cost of the inspections is minimal compared to the value savings long term. The pricing will be clearly defined and acceptable prior to inspection. Please ask about our five-year agreements which save you 20% over the term of agreement.

Upon expiration of your warranty period, if you are interested and would like to take advantage of this proven program and set up an inspection, or would like more information please contact:
