Date: August 26, 2021 Time: 4:30 p.m.

Hybrid Meeting Format (In-person Meeting for Board of Education at MES Board Room, 800 Beech Street & Virtual Components)

Board Committee Members: R. Johnson (C), Griffin, Hollman

| In Attendance: |           |
|----------------|-----------|
| Timer:         | Recorder: |

- 1. Review Post-construction MS/HS Lawn Condition (Information / Action)
- 2. Consider Utility Vehicle Options (Information / Action)
- 3. Overview of Ribbon Cutting and Tours (Information / Action)
- 4. Update on Hosted Solar Project (Information)
- 5. Overview of Major Repairs (Information)
  - a. Irrigation System Pump
  - b. Water Leak in MES Kitchen Storage Room
  - c. 6-Burner Gas Range Replacement in Production Kitchen
  - d. Dishwasher Pump Leak in Production Kitchen
  - e. Vent Pipe Leak on MS/HS Stage
  - f. Roof Leak Around Roof Vent by Entry to School from Fitness Center
  - g. Failed Glycol Pump in the MS/HS Penthouse
  - h. RTU Fan Unit Failing at MS/HS
  - i. Other
- 6. Wisconsin Surplus [2 plow blades and assorted technology devices] \$4,500 + (Information)
- 7. Update from Mr. Wolfgram on Staining Press Box Stairway/Railing (Information / Action)
- 8. Preliminary Information on Rubberized Track (Information / Action)
  - a. Fisher Tracks Inc.
  - b. Athletic Field Services

- 9. Consider Constructing a Heated Storage Building for MS/HS Property (Information / Action)
  - a. Inventory of items to be stored Dan Wolfgram
  - b. Technology Ed. student involvement
  - c. Location
  - d. Future planning Sample of building type from Matt McGregor https://www.bigbuildingsdirect.com/product/maverick-metal-garage-kit-20x30x10 /?gclid=Cj0KCQjwnueFBhChARIsAPu3YkQBOy9Fa5qCXCgD6EaUEXb-kiLo vPEiKTQaV0eK5aSA4s1MzMSR7eEaAmUDEALw\_wcB
  - e. Other
- 10. Update on Manawa Athletic Booster Club Interest in Fundraising for Future Projects (Information / Action)
  - a. Electronic scoreboards for gyms (replacement)
  - b. Rubberized track (replacement) Discuss Future Project Ideas: (Information / Action)
  - c. Other
- 11. Continue Review of Key Performance Indicators (Information / Action)
  - a. Operation Efficiencies
    - i. 20-Year Facilities Plan (Pfefferle)
  - b. Safe & Orderly Environment
    - i. School Safety Plan (establish stakeholder committee for plan review)
- 12. Buildings & Grounds Committee Planning Guide (Information)
- 13. Set Next Meeting Date:
- 14. Next Meeting Items:
  - a. Discuss Maintenance of the School Forest (Information / Action)
     WI School Forest Education Specialist (Gretchen Marshall) and DNR Forestry
     Service
    - LEAF: Wisconsin's K-12 Forestry Education Program
  - b. Recarpet MS/HS Library Solicit Pricing (Information / Action)

c.

15. Adjourn

# RTV-X Series

# **Get ready for an advanced RTV experience.**

Kubota RTVs have been the best-selling diesel utility vehicles in North America since 2004.\* And no wonder. Each year, they set the standard for ruggedness and reliability, proving themselves ready to work day after day under all kinds of conditions.

Well, the best just got a whole lot better. Meet the latest Kubota RTV-X Series, four rough-andready RTV's models that raise the bar on comfort, convenience, and performance.

It's an advanced driving experience, with a smoother ride, better driveability, more legroom, and improved ergonomics throughout.

Ready for an RTV experience you won't forget anytime soon? Visit your Kubota dealer today and experience for yourself the all new RTV-X Series.

\*Power Products Marketing North American Utility Vehicle Market Reports

KUBOTA 4WD DIESEL UTILITY VEHICLE

RTV-X Series

# The Kubota RTV X-Series. Dependable performance, excellent

When there's work to be done on the far side of nowhere, you need a vehicle that can get you there quickly, get the job done efficiently, and get you back comfortably.

#### RTV-X900

Comfort and versatility make this Kubota's most popular model for all types of jobs. It comes with a powerful 21.6 HP diesel engine and your choice of Kubota Orange or Realtree AP Camo styling.

#### **RTV-X1120D**

A step up in power, torque, performance, and style, the RTV-X1120D has everything you need to get the job done, including a rugged and dependable 24.8 HP diesel engine and handsome blue-tinted halogen headlights.

# **Power when and where** you need it

Even when the path disappears, you can rely on the RTV-X Series' powerful diesel engines to keep you moving forward. Kubota-built and trail-proven, these 3-cylinder liquid-cooled diesel engines have a well-earned reputation for dependable performance even in the harshest terrains. The RTV-X900 comes with a robust 21.6 HP engine, while the RTV-X1120D, RTV-X1100C and RTV-X1140 provide an extra boost of power from 24.8 HP engines.

# **RTV-X900**

# VHT-X (Variable Hydraulic Transmission)

Kubota has more experience in variable hydraulic transmissions than any other Utility Vehicle manufacture. The engine torque is maximized through the advanced variable displacement HST motor, resulting in a wider torque band. The Large oil cooler enhances the VHT-X's performance and durability through cooler operating temperatures.

# **Two-speed In-line Shift**

You'll shift less often and maintain better control, thanks to new transmission gearing with just two forward speeds (high and low), plus neutral, and reverse.

# **Strong High-rigidity Frame**

The high-rigidity steel frame isolates the occupants from noise, vibrations, and harshness. With structural strength that few in the industry can match, this durable frame can take years of punishment from

## 20% Larger, Clogresistant Radiator

heavy loads and

rough terrain.

Open the hood, and you'll find the radiator and air-intake located high and up front, where the air is cleaner and cooler. This improves both radiator performance and simplifies maintenance. Kubota's wide fin pitch design minimizes clogging, further improving radiator performance.

# Get in and buckle up. You're about to experience an advanced level of driving performance.

## Front & Rear Extra Duty Independent **Suspension**

Regardless of the terrain or load, independent suspension on all four wheels ensures a truly exceptional ride. **Kubota's Extra Duty IRS (Independent** Rear Suspension) technology also sets a new standard for durability.

# **Height-adjustable Front** and Rear Suspension

Whether you've got a heavy load or no load at all, adjustment of the front and rear suspension height will ensure the proper vehicle height for a smooth ride and optimum driveability for hard to get to work environments.

# **High Ground Clearance**

The X-series raises the bar on ground clearance—to a full 10.4" with 8" of suspension travel—letting you glide over the bumps rather than through them.

#### **Limited-Slip Front Differential**

True 4-wheel drive with a limited-slip front differential and a locking rear differential help reduce wheelspin to a minimum, giving you greater control and a smoother ride on rough or muddy terrain.

### **CV** Joint **Protectors** and **Skid Plates**

Obstacles on the path? CV joint protectors and heavyduty skid plates will protect the most critical parts of the engine and transmission.

# **Mul**ti Wet **Disc Brakes** / Dynamic **Braking**

The RTV-X series uses Multi-disc wet brakes which provide longer brake life. You'll also feel more secure. especially when traveling down long inclines, knowing that dynamic braking is providing additional braking power and greater driving control.

## **60:40 Split-bench Seats**

The split-bench style seat is ergonomically designed to provide hours of working comfort. The driver's side is adjustable fore and aft.\*

\*Driver's side seat adjuster is not available on RTV-X900 General Purpose models.

# Easily accessible Parking Brake

The parking brake is conveniently located on the dashboard for easier access as well as more legroom.

## **Power Steering**

Responsive hydrostatic power steering gives you the control you need to tame any terrain. The steering wheel is tilt-adjustable, allowing you to set the optimum angle for your driving style.\*

\*Tilt-feature is not available on RTV-X900 General Purpose models.

#### **Glove Box\***

A large glove box on the passenger side provides fast access to critical tools and personal effects.

\*Glove box is not available on RTV-X1100C models.

\*Glove box cover is optional on RTV-X900 General Purpose models.

### **Digital Meter Cluster**

Bright, with large, easy-to-read indicators, this digital meter cluster keeps you informed of all critical driving conditions, including speed, hours, and miles traveled. An Overheat Alarm (light and audio) helps prevent engine damage.

# **Under-seat Storage Compartments**

Large compartments under the split-bench seats provide plenty of convenient storage space for tools, tie-downs, and personal items.

# he capacity for hauling, the strength for towing. Carry up to 15.2 cubic feet of cargo It's not enough to get you there and back. You need to get your stuff there and back, as well. This heavy-duty steel cargo box can do that for you, carrying up to a halfton (1,102 lbs.) of tools, firewood, gear, supplies...whatever you need to haul from here to there and back again. Cargo tie-down hooks help keep your gear secure. **Dumping Cargo Box\*** With the flick of a single lever, the hydraulic-lift cargo box rises and your cargo slides out. Cargo that could take significant physical strength and time to unload can now be dumped with little effort in mere seconds. \*Manual dumping on RTV-X900 General Purpose model. \*Photo with factory installed Spray-on Bedliner option.

# Get ready for an advanced level of comfort and performance. Get rea

Here's the one you've been waiting for. The one with more of everything.

More power, more torque, more performance, more style. We call it the RTV-X1120D. You'll call it amazing.

### More powerful engine and transmission

For jobs that require extra acceleration and climbing power, the RTV-X1120-series are the obvious choice. They pack both Kubota's proven 24.8 HP diesel engine and the reliable VHT-X transmission, which provide a top speed of 29 mph as well as plenty of hillclimbing power.

# RTV-X1120D

## **Three-point Seatbelts**

With the RTV-X1120D's increased speed comes increased dynamic loads; so you and your passenger are strapped in with three-point seatbelts.

#### **Half Door**

Half doors on the driver and passenger sides help keep out the dirt, brush, and other external objects, while letting you enter and exit with ease.

# **Alloy Wheels**

You'll travel in style with these good-looking, machine-polished alloy wheels.\* Clear Coating

helps keep them bright and shiny.

\*Realtree AP Camo model features black alloy wheels with polished outer surfaces.

# So comfortable, so fun to drive, you'll find excuses to take it for a spin.

### **Premium Grand Cab**

Whether it's hot and humid, cold and windy, or raining cats and dogs, you'll stay dry and comfortable inside the RTV-X1100C's quiet and luxurious air-conditioned and heated cab. Built around a unibody frame that is virtually airtight, soundproof, and rattle-free, the cab incorporates highly efficient air-conditioning, heating, and defogging functions, as well as antennas and speakers for an optional radio. And when the weather is nice? Just roll down the fully opening windows. This truly is the best all-weather, all-comfort, all-the-time working environment you'll ever experience on the trail.

# MFORT CAB

# RTV-X1100C

# Air Conditioner and Heater

Hot or cold, rain or shine, the temperature inside can always be just right for you. The air conditioner, defroster, and heater system are powerful, efficient, and standard equipment on the RTV-X1100C.

# Unibody Cab and Chassis Frame

You'll enjoy a smoother, quieter, more comfortable ride, thanks to the RTV-X1100C's integrated unibody cab and chassis frame. They form a rigid yet lightweight unit that is rugged, airtight, lownoise, and rattle-free. Even more impressive, the

# Versatility & Performance. Front PTO attachment options for RTV-X1100.

# RTV-X1100C

# Power Module & PTO K-Connect

K-Connect is fast & reliable connection system with high quality LED light, 4 point hitch and optional grill guard, can easily be removed for seasonal storage. The PTO is gear box driven for durability and precision, and fittings are accessible greaseable for preventative maintenance.

LED lights

4 point hitch

Optional front grill adaptor kit

# Control handle & PTO switch.

Simple intuitive control for all implements.

#### **Snowblower 66'**

Professional grade snowblower has 66' wide two stage for commercial use. Equips four blades fan for superior performance and can throws snow farther than competitions. Hydraulic chute rotation and deflection is standard.

# Sweeper 66'

66' wide PTO driven sweeper turns at more than 240 rpm. Standard polyethelene brushes Loaded with 34 (24' diameter) wafer brushes that can easily be replaced within 20 minutes

#### **V-Plow 78'**

back dragging

action.

78' wide plow designed for heavy duty application, to accomodate the width of the RTV-X1100C when fully angled at 30 degree. Double acting cylinder on each wind for true

# **Straight Blade 78'**

78' wide blade you can rely on.
New curvature offers better roll the snow. Operator can use it in float or down pressure for better performance.

# RTV-X1140

From industry-leading cargo capacity to comfortable seating for four adults in three simple steps that can be performed easily by just one person.

**[ K-vertible™ ]** Kubota's unique system to convert vehicle from 1 row to 2 row seating less than a minute.

# Reposition the sides of the bed

Swing the front side panels of the cargo bed towards the back of the bed and fold down the front panel.

# **2** Reposition the cargo bed

Next, lift the front of the cargo bed and secure it.

# Reposition the protective screen and bench seat

Next, move back and secure the protective screen with back rest. Finally, lower and secure the bench seat. Reverse these three steps to restore the RTV-X1140's full-length bed.

# A variety of standard and optional features to let you work productively

### Newly Designed ROPS

The poles at the rear have been eliminated for a cleaner look and easier cargo loading from the sides in the 2-seat configuration. A 5th pole has been added in the rear middle of the frame to ensure the same high level of ROPS performance that meets the SAE J2194 and OSHA 1928 ROPS standards.

### More Comfortable Rear Seat

More legroom for the backseat passengers means more comfort and less fatigue, especially on long journeys. Your crew will arrive fresh and ready for action.

## Standard Hydraulic Dump Bed

Dump sand, gravel, turf, or just about anything you can think of, from the RTV-X1140's whopping, 19.1 cu. ft./9.9 cu. ft. (two-seat and four-seat configurations, respectively) capacity cargo bed. An easy-to-operate lever activates this hydraulic bed-lift system in either two or four-seat configuration.

and travel comfortably.

# RTV-X1140

# A variety of optional cab and accessories further improve comfort, safe

# ty and convenience. C ESS OR ES

For Optional Cab and variety accessories, please see RTV's accessories and attachment brochure or visit our website, "www.KubotaUSA.com".

KUBOTA 4WD GASOLINE UTILITY VEHICL

# RTV-XG850 SDEKICK

For Earth, For Life Kubota

# THIS IS WHAT READY FOR AN

#### POWER

Built around a Responsive and powerful 48 HP gasoline engine, the Sidekick is a multipurpose utility vehicle that's ready for work and hunting expedition. Take on any task or terrain with comfortable, convenient and capable features and a 40 mph transport speed.

#### PERFORMANCE

Kubota's worry-free CVT Plus (Continuously Variable Transmission) with Centrifugal Clutch ensures fast response and rugged durability, so you can be ready for anything with an all-terrain utility vehicle that's truly built to perform.

#### HANDLING

The standard equipment Speed-sensitive 45A EPS (Electronic Power Steering) keeps you safe and stable even when traveling at high speeds across uneven ground. Plus, the independent suspension delivers a smooth ride with plenty of clearance.

# YTHING LOOKS LIKE

#### STYLING

Choose from four distinctive colors—Black, Kubota Orange, Green, and RealTree® AP Camo. Every detail from the bold headlights, the rugged cargo panels, the steering wheel, shift knob and instrument panel are functional and fun. KUBOTA 4WD GASOLINE UTILITY VEHICLE

RTV-XG850 SDEKJCK

# SPEED AND VERSATILITY FOR WHATEVER YOU

As part of Kubota's renowned RTV line of workhorse utility vehicles, the Sidekick is ready to work on the farm, around the pasture and in the woods with industry-leading durability and performance.

A powerful 48 HP gasoline engine takes work performance and

efficiency to all-new levels by providing unprecedented acceleration and fast travel speed. With this kind of speed and versatility, you'll get more work done in less time, leaving you with plenty of time to relax and take in your view.

#### **Speed-sensitive EPS**

Light at low-speed and firm at high-speed, the Sidekick's speed-sensitive 45A EPS (Electronic Power Steering) offers exceptional steering control, improving not only handling, but also stability. Standard on all models, the EPS ensures outstanding performance even when the cabin/cargo box is heavily loaded or the snowblade is attached. Operating at higher speeds, EPS safeguards against oversteering, increasing stability and control.

## Front and rear independent suspension

Even when fully loaded, the Sidekick won't bottom out. Front and rear independent suspension delivers a smooth ride with plenty of clearance. It's designed for the perfect balance of comfort and capable loading performance.

#### Engine braking

Engine braking—engine-assisted deceleration—gives you dependable control down steep slopes. The Sidekick's one-way sprag and centrifugal clutch provides engine-assisted deceleration, letting you concentrate on steering rather than braking. You'll feel an enhanced sense of control and safety, particularly when traveling downward.

#### Selectable full-time 4WD

The selectable full-time 4WD system ensures outstanding traveling performance even under heavy loads, providing superior traction—a class-leading 2,000 lbs. of traction\*—and excellent control under a wide range of terrain conditions. The 4WD system can easily be turned off when 2WD is sufficient for current driving conditions. (\*2,000 lbs. of traction is flat road only. 1,550 lbs. of traction is available on slope.)

#### **Towing capacity**

Be confident in the power of your Sidekick. With a class-leading 2,000 lbs. towing capacity and standard trailer hitch, it's ready for a wide range of towing jobs, from boats to trailers and so much more.

#### Carry up to 15.2 cubic feet of cargo

The Sidekick really shines when you've got a big job to do. Its heavy-duty steel cargo box can carry up to 15.2 cubic feet or half a ton (1,000 lbs.) of tools, firewood, gear, supplies, building material—whatever needs to be moved from here to there. Plus, with seriously smooth suspension and extra clearance, the Sidekick won't bottom out. So go ahead, load it up!

#### **Cargo extender (Optional)**

Extend both the cargo bed and your productivity with this easy-to-attach cargo extender. Simply drop the cargo door, attach the extender, and your RTV's cargo bed is now 25 % longer!

## Steel cargo bed tie-down hooks

The Sidekick's cargo box is equipped, inside and out, with heavy-duty steel cargo tie-down hooks to help keep your gear and other cargo secure while traveling across uneven terrain.

#### **Dumping cargo box**

Fast and effortless, the Sidekick's cargo box with standard assist damper or optional electric over hydraulic lift makes short work of unloading cargo. Simply lift the cargo box or push the switch to dump and watch as the cargo box rises and your cargo slides out. Now that's easy.

### COMFORT AND CONVENIENCE FOR THE LONG HAUL

Wherever you go, the Sidekick will make the journey comfortable and convenient. From the new ergonomic meter panel steering wheel and shift knob, to the bright LED headlights and a ton of convenience utility features, the Sidekick has everything you need to enjoy the trip.

#### **Digital Cluster Panel**

The smart new meter panel alerts you to all major vehicle functions with seatbelt and parking brake alarms and overheating and intermediate gear control indicators. The modern white LCD display provides excellent visibility at all times, even under difficult lighting conditions.

### New steering wheel and shift knob

Designed to match the Sidekick's bold style, the ergonomic steering wheel and shift knob improve driver experience and overall comfort. The angle of the steering wheel can be adjusted\* to fit your posture for easier handling and greater control.

(\*Tilt Steering not available on general purpose model)

#### **LED** headlights

Let your Sidekick lead the way with cuttingedge LED headlights that offer improved brightness and visibility—and last longer, too! For even greater brightness, a 4-headlight option is available.

### Half doors and shoulder guards

Half doors on both sides keep out dirt, brush and other unwanted elements while making it easy to get in and out. Shoulder guards on the ROPS help keep everyone safely inside the vehicle during tight turns.

#### 60:40 Split-bench Seats

The split-bench seat style is ergonomically designed to provide hours of working comfort. Providing the appropriate space for both driver and passenger—now that's smart.

## Under-seat storage compartments

Large compartments under the split-bench seats are ideal for storing tools, tie-downs and personal items.

#### Glove box

A large glove box on the passenger side provides quick and convenient access to personal items and frequently used gear. For safety and security, the glove box is equipped with a cover and a key\*.

(\*glove box door not available on general purpose model)

#### Cup holder DO

A convenient cup holder keeps your beverage tumbler or travel mug secure and always within reach.

#### DC outlet

Charge your phone or other electronic device on the go with a convenient DC outlet.

Build your own custom Sidekick! These optional cabins and accessories will make your RTV experience more comfortable, personal, and memorable.

### KUBOTA MIDSIZE UTILITY VEHICL

# RTV520

# EVOLUTION OF THE KUBOTA WAY.

In every Kubota RTV beats the heart of a tractor. That's because Kubota RTVs are based on the same development and manufacturing philosophies behind Kubota's reliable diesel tractors. Since the original RTV900, every Kubota RTV has been built on this foundation of quality and reliability.

## **RTV900**

2004

Kubota introduced is first utility vehicle. The RTV900 was based on Kubota's highly developed tractor technology.

RTV1100

The industry's first A/C factory cabin model, the RTV1100 offered the RTV900's excellent steering stability and workability plus a new level of comfort even in harsh environments.

RTV50

Kubota's first mid-size model, the RTV500 greatly expanded the Kubota RTV line by offering a quiet, water-cooled, 2-cylinder gasoline engine and enhanced transmission that improved driving stability at low speeds.

## RTV-X-Series

The number 1 diesel utility vehicle in North America, the RTV-X Series can be found working on farms and ranches, construction sites, and municipalities. With the RTV900's exceptional stability at low speeds, superior comfort, and outstanding workability, the RTV-X inaugurated a new era in utility vehicle performance.

#### RTV-XG850

2018

Developed to meet the demands of farmers, ranchers and estate owners with a lot of land to cover. Customers loved the speed and durability of the vehicle. With its launch, Kubota welcomed new customers, like weekend explorers who appreciated the versatility the Sidekick delivers.

# ALL NEW RTV520

Today, Kubota introduces the RTV520. With a bold new look, improved suspension, increased engine displacement, redesigned seat, and optional cabin, the RTV520 builds upon the RTV500's success to set an even higher standard in performance and comfort.

### First U.S. Kubota Tractors

1972
In 1972, Kubota introduced the 17 HP L175, marketed with the tag line "The tractor for

people who want more than a garden tractor."

#### **B-Series**

198

B7100 was the first tractor in its segment that was developed with a hydrostatic transmission. With its launch, sales skyrocketed.

### **BX-Series**

Perfectly positioned between a garden tractor and Kubota's B-Series, the BX made Kubota the first in the industry to offer a true "sub-compact tractor".

### **M-Series**

2006

A full-scale model change for 2006 introduced a re-engineered and redesigned M-Series. Built to tackle just about anything you throw at it, the M-Series is one of Kubota's most durable and efficient to date, boasting a long list of power and comfort improvements.

## M7-Series

The cleanest, most capable, and most powerful tractor Kubota ever built, the M7-Series marked the first time that a Kubota tractor achieved 170 HP.

# MIGHTY CAPABILITY. NIMBLE PACKAGE.

# EVERYDAY PERFORMANCE.

No matter where you go or what job you need to get done, you can count on the RTV520 to make easy work of it, every single time. A liquid-cooled Kubota engine delivers more than 17 horsepower, while the VHT transmission provides single-pedal operation and hill-hold support to increase driver confidence no matter the terrain. The heavy-duty cargo bed with dump capabilities and a towing capacity of 1,168 lbs make quick work of every project on your to-do list.

#### Powerful Kubota Liquid-Coolded EFI Engine

A more powerful 2-cylinder engine provides increased horsepower, with quiet and reliable muscle for any job. Kubotabuilt, the durable engine is liquid-cooled to improve efficiency and ensure consistent performance throughout the day. Electronic Fuel Injection (EFI) makes starting the engine in cold-weather easier, and provides instant power with greater throttle control.

#### **Variable Hydrostatic Transmission (VHT)**

The RTV520's Variable Hydrostatic Transmission (VHT) provides exceptional performance on any terrain with smooth and powerful acceleration. Low-speed driving is made exceptional through smooth throttle control, great traction and increased maneuverability. Plus dynamic braking increases driver confidence with one-pedal operation when traveling downhill and makes jobs that require frequent stops easier.

#### **Heavy-Duty Cargo Bed**

The cargo bed is where work gets done. That is why the RTV520 comes with a large bed (40.6" x 33.6") and 441 lbs cargo capacity, helping you tackle whatever the day brings. A wide opening gives you plenty of space to work, making loading and unloading the bed easy. Plus heavy-duty steel cargo tie-down hooks help keep your gear and cargo secure, even when the terrain is unforgiving.

#### Capable Towing Capacity

The reliable engine delivers capable towing capacity, made simple with a standard trailer hitch for greater versatility and an ability to attach trailers or pull-behind equipment. For those who refuse to compromise, the mighty RTV520 can tackle even the toughest jobs with its 1,168 lbs towing capacity.

# WORRY-FREE OWNERSHIP.

No matter how experienced you are behind the wheel of a utility vehicle, the machine needs to make your life easier. The RTV520 does just that with worry-free ownership, made possible with reduced maintenance, enhanced protection for key components, and easy operation. Rest assured you have a vehicle you can rely on day in, day out.

#### **Easy Operation**

The vehicle is designed to be easy to operate for any driver, regardless of experience. This is made possible with the VHT, where one-pedal operation, smooth acceleration, and engine-braking increase driver confidence and security.

#### **Maintenance Made Simple**

A large cargo bed opening and a closing angle of 52.3 degrees provides easy access to components underneath for quick and simple maintenance. Plus the VHT does not have a belt, removing a component that is traditionally difficult to fix and easy to break. These benefits keep your vehicle ready for any job, by reducing the trips required to get it serviced or repaired.

#### **Durable Design, Protected Components**

Building on the Kubota Design Excellence that comes standard

on every Kubota product, the RTV520 stands apart by protecting key components of the vehicle. Areas of the vehicle like the underbody, and beneath the cargo box and operators station were designed to protect the machine from the unexpected, enhancing the durability of the vehicle.

#### Metal Cargo Bed

Unlike the plastic cargo beds found on competing utility vehicles, the RTV520 features a durable metal cargo bed that can withstand hard use.

#### **New Radiator with Screen**

The RTV520's radiator features a screen that prevents mud and grass from sticking to the radiator. A window provide superior accessibility for cleaning and maintenance.

# GET THERE COMFORTABLY.

Enjoy a smooth, and comfortable ride, thanks to the RTV520's improved suspension and softer seat. The engine improvements also deliver reduced vibration and a quieter ride and can be customized to match any season. We now offer an enclosed cab which delivers protection from the elements even in cold environments.

#### **Capable Suspension System**

The robust and reliable system features a new 5-link rear system which helps prevent the vehicle from bottoming out and improves rider comfort, even in rough terrain.

#### **Comfortable Seat Design**

The stylish matte-black and contoured seats have been redesigned with a 30% softer padding material, to provide better comfort during long rides.

#### **Quiet Engine**

A new, water-cooled 2-cylinder engine produces less noise than both the competition and previous models, making for a guiet and enjoyable ride.

#### **Smooth Operating Experience**

The 360-degree crank and two axis balancer significantly reduces the vibration from the engine, also reducing the feedback to the drivers hands and arms. Drivers can stay focused on the job at hand, even after a long day of work.

# ACCESS ANY AREA.

Access any area with the nimble stature and maneuverability of the RTV520. At 54.7 in. wide, you can easily access narrow roads and squeeze through tight gates. The vehicle is very easy to turn. When combined with a tight turning radius, the RTV520 unlocks areas all over your property or worksite.

#### **Narrow Stance**

The RTV520's compact dimensions let you nimbly maneuver into and out of tight spaces with ease.

#### **Tight Turning Radius**

With a tight turning diameter of just 21.7 ft., the RTV520 can work in narrow sites where bigger utility vehicles can't go.

#### Easy to Turn

RTV520's steering system makes light work of steering. And that means less fatigue after a long day of traveling and greater productivity on the site.

# Cooperative Purchasing

# Put the power of many to work for you

We can help you save time and money by combining the buying power of 50,000 government, education, and nonprofit organizations. Simply pick the appropriate contract or supplier—we do the rest.

Sourcewell holds hundreds of competitively solicited cooperative contracts ready for use. Choose from a wide array of products and services, or work with our in-house specialists to find the solution that fits your needs. We award contracts at the manufacturing level, but they can be leveraged locally to support your local dealer.

**Note**: This is <u>not</u> a contract. For specific PowerGard™ Protection plan Residential coverage, please refer to the terms and conditions on John Deere's public website(<u>www.JohnDeere.com</u>) under Services & Support >Warranty > Extended Warranties > PowerGard protection plan Residential.

#### PowerGard™ Protection Plan Residential (Residential plan) is:

The PowerGard™ Protection Plan Residential is an extended repair plan that provides parts and labor coverage up to four years beyond the manufacturer's warranty.It is available on all riding lawn equipment,zero-turn radius mowers, utility vehicles, utility tractors and compact utility tractors.Your John Deere equipment will be in the hands of qualified, certified technicians from John Deere dealers using Genuine John Deere Parts.

#### Not covered under a Residential plan:

Residential plans do not cover routine maintenance services or items normally designed to be replaced by the purchaser due to normal wear and tear. They do not cover any product used for commercial or rental applications. They also do not cover repairs for damage from accident, misuse, fire, theft, or exposure to weather conditions such as lightning, hail, flood or water. See the actual PowerGard<sup>TM</sup> Protection Plan Residential Terms and Conditions for a complete listing of coverage, and limitations and conditions under the program.

#### Benefits of a Residential plan:

- Offer the choice of adding up to 4 years of repair coverage beyond the machine's factory warranty.
- Do not require preapproval before repairs are made by the authorized John Deere dealership.
- Is transferable by the original purchaser for the balance of the original agreement period.
- Ensures higher resale value and makes equipment more marketable during sale or trade-in.
- Comprehensive Plans:
  - No deductibles and no out-of-pocket costs on covered repairs.
  - Free transportation for factory warranty and extended repair plan repairs for the term of the plan(Note:A surcharge may apply for machines located outside of the dealership's normal service area).
- Limited Powertrain Plans:
  - Low deductibles on covered repairs
  - Do not provide transportation coverage

Athletic Field Services, Inc. General Pricing from Devin Wheat

"Below are a few options for track surfaces. Pricing is in today's price range at current material costs. I don't know if material prices will change for the better or continue to go up in the off-season. I have attached specifications for the products quoted."

Seal-Flex LR6 3/8" depth BLACK: \$84,350.00 Seal-Flex LR8 1/2" depth BLACK: \$108,450.00

BSS100 1/2" depth RED: \$ 180,750.00

#### **BUDGET PROPOSAL**

DATE:

July 1, 2021

TO:

Dr. Melanie Oppor District Administrator School District of Manawa

PROJECT:

High School Track Synthetic Surfacing

#### **BUDGET INCLUDES:**

Cleaning the track with a walk behind blower.

Minor repairs to the surface as necessary. Filling any cracks that may have developed.

Flood coat the existing asphalt track with a solvent based primmer. The primmer will provide a strong bond between the rubber and the asphalt.

Application of a black **FT Poly Mat 5K** – a cast-in-place, durable, resilient, all-weather, running track surface consisting of polyurethane bound rubber base mat. The thickness of the rubber surface shall be 13mm.

Materials, equipment and installation by Fisher Tracks, Inc.

Budget includes the color-coded metric striping per the National Federation of State High School Associations.

Budget includes the application to the (8) lane track oval, high jump and long/triple jump runway.

FT POLY MAT 5K BUDGET: -----\$115,000

#### Notes:

- Add 1% if Fisher Tracks, Inc. is to provide a performance bond.
   Budget is based on a 2021 installation.
   Fisher Tracks, Inc is a member of the America Sports Builders Association and has (3) Certified Track Builders

BY:

Darin Olofson, CTB **Track Consultant** Fisher Tracks, Inc.

## REFERENCE LIST

Mission Statement
Fisher Tracks, Inc. is the "Contractor of Choice" for the construction of synthethic running tracks.

We will provide:
The industry's highest quality workmanship.

The most cooperative and knowledgeable people to work with.
The most reliable products and dependable service in the industry.

A well maintained facility will prolong the life of your investment. Fisher Tracks, Inc. offers the **Cross-Over Zone<sup>TM</sup> Track Protector**. These mats are easily moved and will not damage your facility like plywood can. In addition, these protectors breathe to help eliminate moisture issues that are caused by some of the impermeable protectors that are in the market place. Fisher Tracks, Inc. offers the following maintenance accessories:

Landing Zone<sup>™</sup> Ballasted Pit Cover Bench Zone<sup>™</sup> Sideline Track Protector Bench Zone<sup>™</sup> Sideline Turf Protectors Blowers

For a complete listing, please contact Fisher Tracks, Inc. (800) 432-3191 www.fishertracks.com

## · Notes ·

## FISHER TRACKS, INC.

Certified Track Builder on Staff

#### Poly-Mat Product Specifications

#### PART 1 - GENERAL

#### 1.01 SUMMARY

- A. Product name: Poly-Mat
- Product classification: cast in place, durable, permeable, resilient, all-weather track surface consisting of a polyurethane bound rubber base mat.
  - Option: The mat can be installed full depth in a choice of color.

#### 1.02 MANUFACTURER AND INSTALLER

Fisher Tracks, Inc. 1192 235<sup>th</sup> Street Boone, Iowa 50036 800-432-3191 515-432-3191

Fax: 515-432-3193

E-mail: info@fishertracks.com Web Page: fishertracks.com

#### 1.03 DESCRIPTION OF WORK

- A. The contracted work to be done under these specifications consists of furnishing all the required labor, materials, equipment, parts and supplies necessary for the installation of the running track surface.
- B. The work hereunder shall be done and conform to:
  - American Sports Builders Association Track Construction Manual and Track Construction Guidelines.
  - 2. As prescribed or approved by the applicable governing body.

www.fishertracks.com

CORPORATE OFFICE

#### 1.04 SUBMITTALS

- A. Bidders of this product are to provide a list of at least 5 installations that are a minimum of 3 years old that contain the same products, and use the same method of installation showing locations and the owner representatives. Tracks are to have been installed under the same name and ownership that is presently bidding.
- B. Contractor shall have written maintenance information on this product to be presented to the owner, upon completion of the surface. This will include repair methods and availability of repair materials including cost.

#### 1.05 QUALITY ASSURANCE

- No subcontractors are permitted in the installation of the synthetic surface.
- B. The installing foreman must have at least 5 years experience installing this type of system.

#### 1.06 WARRANTY

- A. The warranty on the all-weather running track surface shall endure for five (5) years from the date of acceptance. This five-year warranty is to be provided directly by the track-surfacing contractor to the owner/general contractor.
- B. The warranty shall cover defects in materials, workmanship, excessive color changes, or excessive wear from track and field use only.

#### 1.07 RELATED WORK

A. When surfacing on new asphalt, the asphalt must meet the specifications and standards set forth by the architect or engineer. The general contractor is responsible for the elevation survey of the asphalt base if required. The asphalt contractor is to provide a flood test of the asphalt base.

- B. The asphalt, or concrete base, should be sufficiently cured and cleaned in order for work to progress. The rules of track construction allow for a maximum longitudinal slope of one tenth of one percent in the running direction. The lateral inclination should meet the published specifications of the relevant governing association.
- C. Grade conformance tests should be conducted on both the base course and the leveling course. The entire surface should have positive drainage. The maximum allowable planarity deviation within a pass should be 1/4 inch in ten feet when measured in any direction. Deficient areas in the leveling course should be corrected as approved by the architect or engineer. After any corrections, the surface should not allow water to stand greater than 1/16 inch deep, one hour after rain has ended.
- D. The general contractor or the owner shall be responsible to have adjacent grass edged and removed from all areas receiving the synthetic surface. It may be necessary to apply a liquid herbicide such as Roundup to any adjacent edges of track and event areas.
- E. On existing tracks, the owner shall apply a liquid herbicide to any vegetation in surface several weeks before new construction. After removal of weeds, a second application should be applied to the crack areas.

#### PART 2 - PRODUCT AND MATERIAL DESCRIPTION

#### 2.01 GENERAL

- A. The specified running track surface is a mixture of graded rubber granules bound with 100% polyurethane binders. The track surface is of a permeable design and the mixture is applied to a pervious or impervious base by means of a mechanically operated screed.
  - Only a high quality polyurethane binder is to be used.
  - The depth shall be a minimum of ½ of an inch (12.75mm) or as specified.
- B. The system has a smooth finish and may be applied for both indoor and outdoor use.

#### 2.02 RUBBER

- A. The Poly-Mat rubber shall be specifically graded elastomeric rubber granules with a controlled gradation between 0.1mm to 3.0mm.
  - Dust and rubber particulate smaller than a No 200 sieve size shall not exceed 4% of the total rubber.
  - 2. The rubber shall be black SBR or EPDM.
  - Colored EPDM granules may also be used.

#### 2.03 PRIMER

- A. The Poly-Mat primer shall be polyurethane based and compatible with asphalt and synthetic track surfacing materials applied at .28 lbs. per square yard.
- B. The polyurethane primer may be diluted to ensure proper penetration of the existing surface.
- C. For an asphalt base, the primer application may be reduced or eliminated when extreme heat conditions soften the asphalt.

#### 2.04 BINDER

- A. The Poly-Mat binding agent shall be a single component; MDI based, moisture cure polyurethane binder.
  - 1. The polyurethane binder is to be 100% solids.
  - The polyurethane binder shall be compatible with SBR and EPDM rubber granules.
- B. All polyurethane binder will be delivered in new unopened containers, clearly labeled by the manufacturer.

#### PART 3 - EXECUTION

A. The asphalt or concrete base should be sufficiently cured and cleaned in order for work to progress. B. The entire surface shall be swept, power blown, or high pressure washed to remove all dirt, oil, grease, or any other foreign matter. The surface shall be free from any loose material.

#### 3.02 LIMITATIONS

- A. Apply the synthetic surfacing materials only during favorable weather conditions. Work is to progress only when adequate curing can be guaranteed by the installer. Minimum temperature shall be 50° and rising.
- B. During surface installation and striping all sprinkler systems must be shut off, or controlled so that no water falls on the track or event surfaces.
- C. All materials will be installed in strict compliance with the manufacturer's recommendations.
- D. During setup, installation, and striping of the Poly-Mat it is the responsibility of the general contractor and the owner to have the entire track area, and other pertinent areas such as football field, concessions, etc., closed and secured of all activities 24 hours per day through the curing and completion of the project.

#### 3 03 INSTALLATION

- A. The entire area to be surfaced shall receive an application of polyurethane primer applied uniformly at a rate between 0.18 – 0.27 lb. per sq. yd. A minimum cure time of 30 minutes is required before application of the base mat materials.
- B. The mixing ratio of rubber to binder should not be less than 5 parts rubber to 1 part binder as determined by the weight of the products. The materials shall be prepared in a mechanical mixer until a homogenous mix is obtained.
- C. The mixed materials making up the Poly-Mat shall be applied by a mechanically operated finishing machine, which shall have an electrically heated screed. The surface will be applied in one layer to the specified depth.

D. The cured edge of each joint shall be primed with the Poly-Mat binding agent prior to the laying of the adjacent base mat. All joint work will be troweled flush with the adjacent mat.

#### 3.04 STRIPING

- Experienced personnel specializing in all-weather running track striping shall accomplish all striping.
- B. Provide lane lines, starting lines, and markings required, and conform to the standards for track construction as prescribed by the applicable governing body.
- C. Contractor shall verify with the owner's representative for exact locations, size, shape, and color of the lines and markings before proceeding with markings and striping.
- D. Calculations shall be made to the nearest 0.001'. These shall be rounded to the nearest 0.01' for marking.
- A transit or theodolite capable of reading direct to 20 seconds shall set angles.
- F. Measurement shall be made with a steel tape in engineering scale that will read directly to 0.01'.
- G. All lane lines shall have a width of 5cm (approximately 2").
- H. Track certification as to its accuracy for the correct distance of 400m around the track oval shall be provided by the track professional.

#### 3.05 CLEANING

A. Upon completion of all work, remove all containers, surplus materials and installation debris. Leave area of work in clean orderly condition.

#### **BSS 100**

#### **Basemat with Waterbased Structural Spray Synthetic Track Surfacing System Specifications**

#### Part 1 - General

#### 1.1 Scope

- A. The synthetic surfacing contractor shall furnish all labor, materials, equipment, supervision, and services necessary for the proper completion of all BSS 100 Synthetic Track Surfacing and related work indicated on the drawings and specified herein.
- B. The synthetic surfacing contractor shall refer to the drawings for the required locations of synthetic track surfacing to be installed. All quantities and dimensions shall be field verified by the synthetic surfacing contractor.

#### 1.2 **Specific Scope of Work**

- A. Install a World Athletics (WA) approved, porous polyurethane synthetic track system comprised of a base layer of polyurethane-bound SBR granules and topped with BEYPUR 160, a waterbased single-component polyurethane structural spray, and EPDM granules.
- B. Layout and paint all track lines and event markings as required and specified by current WA, NCAA and NFHS rules.

#### 1.3 Coordination

A. The synthetic surfacing contractor shall coordinate the work specified with an authorized and appointed representative of the owner so as to perform the work during a period and in a manner acceptable to the owner.

#### Part 2 - Codes and Standards

#### 2.1 **Applicable Publications**

- A. Codes and standards follow the current guidelines set forth by World Athletics (WA) and the National Collegiate Athletic Association (NCAA).
- B. State of California Department of Public Health (CDP Standard Method V1.1, Standard Method for the Testing and Evaluation of Volatile Organic Chemical

2020-09-14 V3

Emissions From Indoor Sources Using Environmental Chambers Version 1.1, dated February 2010

- C. UL-2818 GREENGUARD Certification Program for Chemical emissions for Building Materials, Finishes and Furnishings; March 29, 2013.
  - a. The GREENGUARD Gold Certification standard includes health-based criteria for chemicals and requires low VOC emission levels to help ensure that products are acceptable for use in environments like schools and healthcare facilities.
  - b. GREENGUARD Gold Certifications provide evidence of indoor-airemissions testing according to stringent requirements exceeding the State of California indoor air quality for schools and GSA standards.
     GREENGUARD Gold certifications fulfill the credit requirements of LEED and other high performance building programs for low-emitting products.

#### 2.2 Performance Standards

The **BSS 100** Basemat with Waterbased Polyurethane Structural Spray Track Surfacing System shall exhibit the following minimum performance standards as required by WA:

A. Thickness: 13mm or as specified by WA

B. Shock Absorption: 35 to 50%C. Vertical Deformation: 0.6 to 2.5mm

D. Friction:  $\geq 0.5$  (47 TRRL Scale)

E. Tensile Strength:  $\geq 0.4$  MPa F. Elongation at Break:  $\geq 40\%$ 

#### Part 3 – Quality Assurance

#### 3.1 Contractor and Manufacturer Qualifications

- A. The CONTRACTOR and the MANUFACTURER must be the same.
- B. The CONTRACTOR and the MANUFACTURER must have a minimum of 10 years' experience in the manufacturing and installation of the same waterbased polyurethane structural spray synthetic track surfacing system specified.
- C. The CONTRACTOR shall be able to furnish evidence that they have been in business for a period of not less than 5 years, under the present name, and if required, furnish financial statements for each of the past 5 years.

- D. The CONTRACTOR must have installed a minimum of 10 outdoor track facilities in the last 3 years using the exact, WA certified, synthetic track surfacing, as specified herein with the contractor bidding this project.
- E. The MANUFACTURER must have a minimum of 10 years of experience compounding two-part polyurethane for athletic surfaces.
- F. The CONTRACTOR is required to provide documentation that shows the selected specified and installed product meets current WA Performance Standards for Synthetic Surfaced Athletics Tracks (Outdoor) and is certified in terms of the WA certification system as updated to present day.
- G. CONTRACTOR is to provide a list of completed facilities, minimum of 10 which are certified to meet WA/NCAA rules & regulations, utilizing the same product as specified.
- H. Specified Surfacing System must be UL Environment **GREENGUARD Gold Certified**.
- I. The MANUFACTURER must offer a minimum of nine (9) GreenGuard Gold Certified Synthetic Track Surfacing Systems.
- J. The MANUFACTURER must offer a minimum of nine (9) WA Certified Track Systems.
- K. All polyurethane components must be MANUFACTURED in the United States in the MANUFACTURERS own ISO 9001:2015 Certified QMS Facility to ensure the highest quality materials.
- L. The CONTRACTOR must have installed a minimum of five (5) Class I WA Certified outdoor tracks within the United States.

#### 3.2 Submittals

2020-09-14 V3

The following submittals must be received with bid submittal:

- A. Standard printed specifications of the synthetic track surfacing system to be installed on this project.
- B. An affidavit attesting that the synthetic track surfacing material to be installed meets the requirements defined by the manufacturers currently published specifications and any modifications outlined in those technical specifications.

- C. A synthetic track surfacing system sample of the same synthetic track surfacing system to be installed on this project.
- D. A list of completed facilities, including the installing supervisor, of the exact synthetic track surfacing system.
- E. GreenGuard Gold Product Certification.
- F. A current WA Certificate proving the product to be installed meets the current WA Performance Standards for Synthetic Surfaced Athletics Tracks (Outdoor).

#### Part 4 - Materials

#### 4.1 Primers

A. Primers shall be BEYPRIM, a polyurethane-based primer specifically formulated to be compatible with the paved-in-place SBR granules, BEYPUR 300/320 and BEYPUR 160 track surfacing material.

#### 4.2 Black SBR Granules

A. The rubber granules for the base mat shall be recycled SBR rubber, processed and chopped to 1-3mm size, containing less than 1% dust.

#### 4.3 EPDM Granules

A. The rubber granules for the BEYPUR structural spray wearing coats shall be EPDM, synthetic rubber containing a minimum 20% EPDM resin, with a specific gravity of  $1.5\pm0.1$  g/cm3. The EPDM rubber shall be the same color as chosen by the owner for the track surface.

#### 4.4 Polyurethane Binder

A. Binder for the black mat shall be BEYPUR, an MDI-based single-component, polyurethane binding agent. The binder shall not have a free TDI monomer level above 0.2% and must be solvent free. The binder must be specially formulated for compatibility with SBR rubber crumb.

#### 4.5 Structural Spray Coating

A. The spray coating shall be BEYPUR 160, a waterbased, pigmented aliphatic polyurethane, specifically formulated for compatibility with EPDM granules. The coating shall be the color specified by the owner. Pigment intergraded in the field shall not be allowed.

#### 4.6 Line Marking Paint

A. Manufacturers recommended pigmented line paint.

#### Part 5 - Installation

#### 5.1 Subbase Requirements

#### A. Asphalt Compaction

- a. The Synthetic Track Surfacing System shall be laid on an approved subbase. The General Contractor shall provide compaction test results of 92-96% for the installed subbase and asphalt surface.
- b. For certification the following criteria must be followed. The track surface, i.e. asphalt substrate, shall not vary from planned cross slope by more than +/- 0.2%, with a maximum lateral slope outside to inside of 1% for NCAA and 2% for NFHS, and a maximum slope of 0.1% in any running direction. The finished asphalt shall not vary under a 10' straight edge more than 1/8".
- c. It should be the responsibility of the asphalt-paving contractor to flood the surface immediately after the asphalt is capable of handling traffic. If, after 20 minutes of drying time, there are birdbaths evident, it shall be the responsibility of the architect, in conjunction with the surfacing contractor, to determine the method of correction. No cold tar patching, skin patching or sand mix patching will be acceptable.

#### B. Asphalt Quality

a. No Recycled Asphalt Pavement (RAP) shall be used in the wear course asphalt mix design as the inclusion of RAP as an off-set to virgin asphalt binder results in a brittle hot-mix asphalt (HMA) with significantly lower tensile strength and fatigue resistance. The sports surfacing contractor will not be held responsible for asphalt failures resulting from the inclusion of RAP in the HMA mix design of the wear course.

b. Any oil spills (hydraulic, diesel, motor oil, etc.) must be completely removed, either by chipping out or removing and replacing with new, keyed in asphalt. The minimum depth of any asphalt replacement shall be one inch. The curing time for the asphalt base is 28 days.

#### C. Responsibility of Others

a. It shall be the responsibility of the general contractor to determine if the asphalt substrate meets all design specifications, i.e. cross slopes, planarity and specific project criteria. After all the above conditions are met, the synthetic surfacing contractor must, in writing, accept the planarity of the asphalt receiving base, before work can commence.

#### 5.2 Thickness

A. The thickness of the **BSS 100** Basemat with Waterbased Polyurethane Structural Spray Synthetic Track Surfacing System shall be 13mm.

#### 5.3 Equipment

- A. The **BSS 100** Basemat with Waterbased Polyurethane Structural Spray Synthetic Track Surfacing System components shall be processed and installed by specially designed machinery and equipment. A mechanically operated paver with variable regulated speed and thermostatically controlled screed shall be used in the installation of the base mat. The wearing course shall be installed using automatic electronic portioning, which provides continuous mixing and feeding for an accurate, quality controlled installation.
- B. No hand mixing is allowed.

#### 5.4 Installation

#### A. Base Course

The SBR granules and BEYPUR shall be mixed together on site to regulate the ratio/quantity of SBR, not to exceed 82% by weight in the base mat portion of the system. The single component polyurethane binder shall be mixed with the SBR rubber so that a minimum of 18%, by weight, exists in the final mixture. This mixture is then mechanically installed using the paver.

#### B. Wearing Course

The 0.5 to 1.5 millimeter EPDM granules shall be mixed with BEYPUR 160, the waterbased single-component structural spray coating. The structural spray shall be applied in two (2) uniform applications.

#### 5.5 Site Conditions

- A. Installation shall not take place if adjacent or concurrent construction generates excessive dust, abrasives or any other by-product that, in the opinion of the installer, would be harmful to the track material, until completion of such works.
- B. Apply Synthetic Track Surfacing in dry weather when pavement and atmospheric temperatures are forty-five (45) degrees Fahrenheit or above.
- C. The maximum temperature cannot exceed 105 degrees at any point during a 24 hour period.
- D. Rain cannot be falling. If there is a threat of rain, work shall cease until dry conditions can be re-established on the track pavement. Work is to proceed only when adequate curing can be guaranteed by the manufacturer.

#### Part 6 - Line Striping and Event Markings

#### 6.1 Layout

A. Line striping and event markings shall be laid out in accordance with current WA, NCAA and NFHS rules.

#### 6.2 Certification

A. Upon completion of the installation, the owner shall be supplied with all necessary computations and drawings, as well as a letter of certification attesting to the accuracy of the markings.

#### Part 7 - Guarantee

A. The **BSS 100** Track Surfacing System shall be fully guaranteed against faulty workmanship and material failure for a period of five (5) years from the date of acceptance.

- B. The warranty shall be fully third party insured; prepaid for the entire five (5) year term and be non-prorated. The insurance policy must be underwritten by an "AM Best" A rated carrier.
- C. Synthetic surfacing material found to be defective as a result of faulty workmanship and/or material failure shall be replaced or repaired at no charge, upon written notification within the guarantee period.

**END OF SECTION** 

## **BEYPUR 160**

## WATER-BASED POLYURETHANE STRUCTURAL SPRAY

Applied on our BSS 100 & 200 systems, the BEYPUR 160 water-based structural spray offers an environmentally friendly application with proven durability.

Certified GreenGuard Gold, BEYPUR 160 emits low to zero VOCs (volatile organic compound) and has an absence of isocyanates. The application delivers improved air quality for your program and surrounding areas.

With reduced overspray at the time of installation, the application allows for less site preparation and faster dry times, allowing your athletes to get back on track faster. Engineered for optimal results in the majority of climates, Mother Nature will have little effect on your surface's integrity.

Installed on over 100 Beynon projects in the past decade, the application has showcased proven durability, enhanced UV protection, reduced chalking deposits and improved long-term color retention.

ENVIRONMENTALLY FRIENDLY

ENHANCED UV PROTECTION

PROVEN EXPERIENCE

REDUCED CHALKING DEPOSITS (OXIDATION)

IMPROVED COLOR RETENTION

CLEAN & QUICK INSTALLATION

## **BEYPUR 160 COLOR SELECTION**

This handout is used for illustrative purposes only and is not an accurate representation of the actual product.

As such, its size, colors and materials may vary.

### Seal-Flex® LR-6 Specification

Protected under U.S. Patents #4474833, 4529622

The Seal-Flex rubber running surface shall be applied over a proper substrate, paved to tolerance as specified by the Architect or Engineer and allowed to cure approximately seven days or after a substantial rainfall to insure an oil free surface.

The Seal-Flex surface course shall consist of six applications of stranded rubber aggregate bound by successive applications of latex compounds to achieve a total depth of 3/8", or greater, as specified.

#### MATERIALS:

<u>Rubber - Stranded rubber aggregate strands for Seal-Flex base rubber course shall be no longer than  $\frac{1}{2}$ , contain less than .5% dust and properly ground and graded to a minus  $\frac{1}{4}$  inch to a plus 30 mesh gradation. Specific gravity  $\frac{1.15 + -2}{1.2}$ .</u>

No chunk or EPDM rubber will be allowed in any part of the system.

<u>Binder</u> – The carboxylated butadiene latex binder shall contain a minimum of 50% solids. To be diluted per manufacturer's recommendations, not to exceed 30% by volume. Latex to be delivered in transport tanker designed specifically for this purpose. The use of asphalt emulsions shall not be allowed in any part of this system. The latex binder shall meet the following minimum standards:

Polymer Type: Carboxylated Styrene Butadiene

Total Solids: 50% PH: 9.0

Viscosity (#2 Spindle @ 20 rpm) 200 cps
Weight/Gallon: 8.35 lbs.
Particle Charge: Anionic
Residual Monomer: 0.07% max

Tg Value: -7C

<u>Aqueous Dispersion Colorant</u> – Shall be used during every spray application of the installation process, except the primer application. The color shall be black. Colorant shall be added at a rate approved by the manufacturer and adequately mixed to assure proper suspension. Shall contain no lead, and will meet the approval of the USDA. Purpose of the coolant is to enhance resistance to ultraviolet light, ozone damage and oxidation. Will meet the following minimum specifications:

Strength: =5% by weight
Grind Hegman: 6 minimum
PH: 8.0 - 8.5
Viscosity: 80 - 100 Kus

Antioxidant: Yes

Freeze-thaw Stability: Stable at -10c.

#### APPLICATION:

The latex binder shall be placed in a mixer equipped with a pump and spray system capable of producing ten to forty pounds per square inch.

The base rubber aggregate shall be applied over the entire surface to receive Seal-Flex running surface at approximately 1 lb. per square yard. The rubber aggregate shall be sprayed with latex composition with dilution rate at no more than 40% and additives as formulated by the Seal-Flex Corporation at approximately .1 gallons per square yard. When dry, successive applications of base

rubber at approximately 1.35 lbs. per square yard shall be applied to each coat. Latex application at approximately .2 gallons per square yard shall take place on each rubber coat. The base rubber surface shall receive an application of surface rubber aggregate according to specifications by the Seal-Flex Corporation to achieve the desired texture and spike protection. A final latex spray with UV protection additive shall be applied over the entire Seal-Flex surface.

#### LINES:

Lines shall be accurately placed in accordance with engineer's plans as specified and in coordination with the school athletic department. They shall conform to the National Federation of State High School Associations, National Collegiate Athletic Association, or American Sports Builders Association rules and specifications, whichever is appropriate and applies. All event markings shall be clearly identified in lane two. Measurements shall be made on the track to the nearest  $1/100^{\text{th}}$  of a foot. Angles for event markings shall be set by using a theodilite capable of reading direct to 20 seconds. Marking on the curves by chord length method will not be allowed. The line paint material shall be water base acrylic latex, compatible with rubber and hereinbefore-specified latex material. No subcontractor shall be allowed to perform this work.

#### **GENERAL LIMITATIONS:**

No phase of this construction shall take place unless the ambient temperature is above 50 degrees Fahrenheit and rising, nor when rain is imminent or falling, nor when other conditions are obviously unsuitable.

#### **INSTALLER QUALIFICATIONS:**

The resilient track surfacing contractor shall be an authorized Seal-Flex licensed installer and has completed at least 25 projects of similar magnitude and complexity.

#### **WARRANTY**:

Special project warranty: Submit a written warranty guaranteeing to correct failures in materials and workmanship which occur within the warranty period, including those attributable to abnormal aging. Warranty period: Five (5) years from the date of substantial completion and acceptance.

#### **SUBSTITUTIONS:**

Each bidder represents that his bid is based upon specified materials and equipment described in the bidding documents.

No substitutions will be considered unless request has been submitted to the owner for approval at least ten (10) days prior to the date of receipt of bids. Substitution request shall be written and accompanied by adequate technical and cost data. Substitution request shall include a complete description of the proposed substitution, name of the material or equipment for which it is to be substituted, drawings, cuts, performance and test data, and any other data or information necessary for complete evaluation by the owner.

If the owner approves any proposed substitutions, such approval will be set forth in an addendum not less than seven (7) days prior to the date for the receipt of bids.

Seal-Flex® Corporation Genesee Depot, WI 262-968-9101

#### Seal-Flex® LR-8 Specification

Protected under U.S. Patents #4474833, 4529622

The Seal-Flex rubber running surface shall be applied over a proper substrate, paved to tolerance as specified by the Architect or Engineer and allowed to cure approximately seven days or after a substantial rainfall to insure an oil free surface.

The Seal-Flex surface course shall consist of eight applications of stranded rubber aggregate bound by successive applications of latex compounds to achieve a total depth of 1/2", or greater, as specified.

#### MATERIALS:

<u>Rubber</u> - Stranded rubber aggregate strands for Seal-Flex base rubber course shall be no longer than  $\frac{1}{2}$ , contain less than .5% dust and properly ground and graded to a minus  $\frac{1}{4}$  inch to a plus 30 mesh gradation. Specific gravity  $\frac{1.15}{-2}$ .

No chunk or EPDM rubber will be allowed in any part of the system.

<u>Binder</u> – The carboxylated butadiene latex binder shall contain a minimum of 50% solids. To be diluted per manufacturer's recommendations, not to exceed 30% by volume. Latex to be delivered in transport tanker designed specifically for this purpose. The use of asphalt emulsions shall not be allowed in any part of this system. The latex binder shall meet the following minimum standards:

Polymer Type: Carboxylated Styrene Butadiene

## SCHOOL DISTRICT OF MANAWA KEY PERFORMANCE INDICATORS

| Key Performance Indicators  | Notes  |
|---|--|
| <ul> <li>I. Learning <ul> <li>A. Students will be proficient or better on internal predictive tests. (See bar graph slides.)</li> <li>1. Early Math (gr. 4K-K) &amp; Literacy Screeners (gr. 4K-1)</li> <li>2. STAR Reading &amp; Math (gr. 1-8)</li> <li>3. Aspire Periodic/PreACT/Mosaic (gr. 9-10)</li> <li>B. 90% of K-12 students engaged in doing service projects annually.</li> <li>1. 2019-20 MES 100% of students (Pre-COVID-19 data)</li> <li>2. 2019-20 MMS baseline not established at that time</li> <li>3. 2020-2021 MMS 100% participation</li> <li>4. 2019-20 LWHS 69% of students participated in some form of volunteerism</li> <li>5. 2020-2021 LWHS 86% of students participated in some form of volunteerism</li> </ul> </li> <li>C. ISTE Standards will be 100% implemented by the end of the 2023-24 school year.</li> <li>D. Assess effectiveness of new secondary social studies resources using student proficiency of the course standards.</li> <li>E. 25% of students received post-secondary credits or certification(s) by the conclusion of the 2023-24 school year; 35% in 5 years.</li> <li>1. 2019-20 LWHS 19% of students received post-secondary credits or certifications</li> </ul> | Internal predictive tests-universal screeners as defined by building/grade that predict how students will do on mandated assessments. (STAR, Fountas and Pinnell Running Records, Lucy Calkins)  Proficiency for each predictive test is based on the state proficiency level except early literacy and math that are locally created.  Volunteerism will be based on school sponsored or school-based groups/organizations who provide a service to the community.  ISTE stands for the International Society for Technology and Education and is a global institution on research-based best practices in technology education and innovation.  There are 6 AP classes; 1 CAAP class; and 3 articulated with Fox Valley Technical College. |

#### SCHOOL DISTRICT OF MANAWA KEY PERFORMANCE INDICATORS

#### II. Operation Efficiencies

- A. Maintain an annual balanced budget.
- B. Levy to the allowable authority.
- C. Workers Compensation Experience Rate (a.k.a. MOD rate) will be kept under 1.0
  - 1. 2020 rate is 1.04
  - 2. Cannot go lower than 0.70 statistically
- D. Bond Rating A+ (2019)
- E. Update and implement 20-year Facilities Plan.
- F. Update and implement a <u>5-year Technology Plan</u>.

To levy a tax means to collect a tax by legal authority

MOD rate is a premium multiplier that measures the difference in the past workers compensation claims to the expected claims. This either increases or decreases the workers compensation insurance premium.

A bond rating is a credit score obtained when borrowing. The District used Standard & Poor's (AAA-D) for our last referendum debt. This bond rating was established based on a stable local economy, a strong available fund balance, a moderate overall debt burden, and good district management practices. This is offset by declining enrollment.

#### III. Safe & Orderly Environment

- A. 95% of students have no major offense.
  - 1. High School (2020-2021): 86.4% of high school students didn't have a major offence
  - 2. Middle School (2020-2021): 87.1% of middle school students didn't have a major
  - 3. Elementary (2020-2021): 72% didn't have a major offense
- B. Maintain an annually approved School Safety Plan.
- C. No Out-of-School Suspensions/Expulsions
  - 1. Elementary = 0 in 20-21
  - 2. Secondary = 0 expulsions in 20-21 and 7 High School suspension and 7 Middle School suspensions
- D. 100% compliance with drills (evacuation, lockdown, lock out, shelter in place, etc.).

Major Offense - Behavior that rises to the level of administrative referral and/or police intervention.

#### SCHOOL DISTRICT OF MANAWA KEY PERFORMANCE INDICATORS

#### IV. Engagement & Satisfaction

- A. Staff retention rate at 92% or higher.
  - 1. 2019-20 Retention Rate: 96.3%
  - 2. 2020-21 Retention Rate: 84.1%
    - a) 2020-21 resignation due to retirement: 5/85 = 5.9%
    - b) 2020-21 resignation (not retirement): 9/85 = 9.6%
- B. Less than 5% of K-12 students are chronically absent per WISEdash state expectations by the conclusion of the 2023-24 school year.
  - 1. 2020-21 MES 3.4% of students chronically absent
  - 2. 2020-21 MMS 6.5% of students chronically absent
  - 3. 2020-21 LWHS 6.9% of students chronically absent
- C. Secondary student engagement based on participation in co-curriculars (unduplicated count)
  - 1. MS: 63% of students engaged in at least one or more offering
  - 2. HS: 74% of students engaged in at least one or more offering
- D. Decrease open enrollment out/Increase open enrollment in.
  - 1. Establish Baseline
- E. Establish New Staff Survey School Perceptions
- F. Establish Parent Survey School Perceptions
- G. Establish Student Survey School Perceptions

Retention Rate: the number of employees that left during the school year divided by the number of employees total at the end of the school year

Exit Survey: Currently only BOE members receive this data, it is suggested that the BOE creates a summary of recommendations to be shared with the administrative team.

Definition of Chronically Absent: Students are considered to be chronically absent if they miss 16% of school days per the DPI.

Open enrollment percent is based on all available possible resident students in the district (includes: St. Paul, all parochial/private school, homeschool, open enrollment out, current SDM enrollment but exclude Amish)
