## Scoreboard

Lance Litchfield litchfield@manawaschools.org> Mon, Apr 17, 2023 at 10:03 AM To: Melanie Oppor <morphor@manawaschools.org>, Pete Griffin cpriffin@manawaschools.org>

Good morning,

I was asked to provide a written document on the scoreboards for the Elementary Gym and the HS Gym.

My thoughts with the scoreboards is to go with Daktronics. Daktronics has been a company I have worked with for numerous years. I used these same daktronics scoreboards in Tigerton and Cochrane-Fountain City. I will be at the committee meeting on Tuesday. I am looking forward to it.

Please let me know if you need anything else in the meantime.

Thank you

Lance Litchfield

Carmen O'Brien, Business Manager School District of Manawa 515 East 4<sup>th</sup> Street Manawa, WI 54949

Subject: Policy Number: CMRPC480003102

Dear Mrs. O'Brien:

On Wednesday, April 5, 2023, I visited the School District of Manawa to complete an insurance survey related to the commercial package insurance coverage.

First, I met with you to obtain an overview of your school district's facilities and operations. We also reviewed the areas of special events, use of facilities by outside groups/organizations, use of contractors, security, and loss/incident investigation procedures.

Next, you and I conducted a tour of the high school, middle school, elementary school, and the respective playground.

During my visit, several conditions were noted where improvement is needed to reduce the possibility of loss. These improvement needs are addressed in the attached recommendations.

Please let me know of the action taken or planned for each recommendation by June 1, 2023.

I want to thank you and the staff of the School District of Manawa for the time and assistance provided during my visit.

Should you have any questions regarding the attached recommendations, or desire risk control assistance in the future, please call me (717) 790-2308.

Sincerely, Patrick Rucinski

## **RECOMMENDATIONS:**

## **Stage Curtain Flammability – Inspection;**

23-01 At the time of my visit the manufacturer/inspection tags could not be located to verify the stage curtains in the Little Wolf High School auditorium meet NFPA requirements for flame resistance. Depending on the curtain, some flame-resistant treatments typically only remain effective for three to five years. To reduce the risk of fire in this area, the curtains flame resistance should be verified, and the curtains inspected and repaired as needed in order meet NFPA 705 standards for flame tested textiles and film.

## Nitric Acid Storage – Separate Storage Compartment;

23-02 Although acids are currently being stored in an acid storage cabinet within Little Wolf High School chemistry lab, a separate storage compartment is not provided for the storage of nitric acid.

To reduce the potential for a reaction between spilled products, particularly between nitric and acetic acid, a separate polypropylene storage compartment should be placed in the acid cabinet for the storage of nitric acid.

## **Gymnasium Water Fountains – Remove:**

23-03 At the time of my visit, (4) water fountains were noted above the floor in the Manawa Elementary School gymnasium. Water fountains in gymnasiums present the potential for significant property damage. A water leak, especially during unoccupied hours, could result in over \$100,000 of damage to the gymnasium floor. In addition, the water fountains present the potential for personal injury during athletics. To reduce the potential for extensive property damage, and personal injury, the water supply to the fountains should be shut off and the water fountains removed.

To: Board of EducationFrom: Danni BrauerDate: 4/12/23Re: Hands in the Mud Summer School Project

Ms. Ujazdowski will be teaching a gardening class during summer school called Hands in the Mud. The students in the class will be cleaning out the school garden and would like to take on a small landscaping project. I am proposing that the group beautify the area around the front entrance at MES where there is currently no grass growing. They would put down fabric, plant a low maintenance bushes/perennial plants, and cover the area with river rock. The cost of supplies will come out of the building budget.

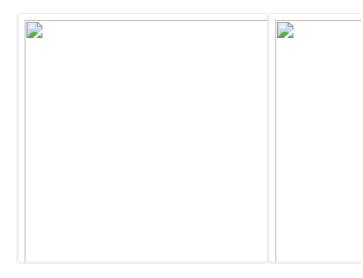

## Students choosing to excel; realizing their strengths.

To:Board of EducationFrom:Danni BrauerDate:4/12/23Re:Tree Planting

Mrs. Krueger is running the first-ever MES Family Book Club throughout the month of April. We are reading "Wishtree" by Katherine Applegate. The book is told by a Red Oak tree named Red and is about community and acceptance. As a culminating activity for the book club, We would like to plant a red oak tree in the front of our school and dedicate it as our "Wishtree". Mrs. Krueger will be donating the tree.

As a result of this project, Mrs. Krueger hopes to encourage kindness and sense of community. She also hopes to promote a love of nature in our students. We would like to plant the Red Oak outside the Boad Room window in line with the current trees.

# **Northern Red Oak** *Quercus rubra*

Bristle-tipped leaves turn red in the fall. The leaves have 7 to 11 waxy lobes. A good street tree, tolerates pollution and compacted soil. Grows as much as two feet a year for 10 years. Grows to 60' to 75', 45' spread. (zones 3-8)

Mature Size

The northern red oak grows to a height of 60–75' and a spread of around 45' at maturity.

	Grov
--	------

**Growth Rate** 

This tree grows at a fast rate, with height increases of more than 24" per year.

#### 4/16/23, 10:31 AM

### Northern Red Oak Tree on the Tree Guide at arborday.org

Full sun is the ideal condition for this tree, meaning it should get at least six hours of direct, unfiltered sunlight each day.

# Soil Preference

The northern red oak grows in acidic, loamy, moist, sandy, well-drained and clay soils. While it prefers normal moisture, the tree has some drought tolerance.

\_\_\_\_\_

## **Attributes**

This tree:

- Grows more than two feet per year for 10 years.
- Provides great fall color, with leaves turning russet-red to bright red.
- Is easier than most to transplant.
- Features alternating leaves that are 4–8" long and have 7–11 waxy, spine-tipped lobes.
- Produces pale yellow-green catkins that appear at about the same time new foliage is expanding, typically April–May.
- Yields acorns that are round and  $\frac{3}{4}-1$ " long with a flat, thick, saucer-like cap.
- Offers great shade due to a dense crown.
- Tolerates pollution and compacted soil.
- Grows in a rounded shape.

# Wildlife Value

Acorns from this tree are at the top of the food preference list for blue jays, wild turkeys, squirrels, small rodents, whitetail deer, raccoons and black bears. Deer also browse the buds and twigs in wintertime.

#### Northern Red Oak Tree on the Tree Guide at arborday.org

The northern red oak has been a favorite of both lumbermen and landscapers since colonial times. The tree has also found favor when transplanted in Europe. It is believed that Bishop Compton's garden, near Fulham in England, received the first red oak transplant abroad in the late 17th century. In 1924, there were over 450 acres of red oak plantations in Baden, Germany.
