

4K Standards

In 4K our students work to develop skills to:

- * Recognize some letters of the alphabet, and especially the letters in their name
- * Count to 20 and recognize some of the numbers
- * Be able to write their name and recognize it
- * Have an understanding of rhyming (This is very hard for some)
- * Create simple patterns (ie- star, circle, star, circle...)
- * Be able to identify shapes (Circle, square, rectangle, triangle, oval, heart, and star)

I will attempt to assess their letters, patterns, counting, shapes, and rhyming by having a video conference call with each student. For those without the capabilities, I will have to come up with something else.

Their name writing has been assessed all year. All of my students have already been successfully writing their names. I did send some name sheets home that I asked parents to return to school. I will use those to make sure that they are still accurately writing their name.
