

Name	Power Standard	Anticipated Methods of Assessing this Standard
AP Calculus (6th Hour)	LO 3.4D: Apply definite integrals to problems involving area, volume, (BC) and length of a curve.	Assessments will be done predominantly with the Khan Academy Program. Students will complete online exercises, quizzes, and tests. Students may also be asked to submit written responses to lessons. Google Meet will be used as a tool to assist students with their online learning.
AP Calculus (6th Hour)	LO 3.4E: Use the definite integral to solve problems in various contexts.	
AP Calculus (6th Hour)	LO 3.5A: Analyze differential equations to obtain general solutions.
