

Earth Science	Power Standard	Methods of Assessing this Standard
HS-ESS3-6	Use a computational representation to illustrate the relationships among Earth systems and how those relationships are being modified due to human activity.	Build at-home models with different materials/create simulations, gizmos, Google forms
HS-ESS3-2	Evaluate competing design solutions for developing, managing, and utilizing energy and mineral resources based on cost-benefit ratios.	Recycling information powerpoint project, sample problems
HS-ESS3-1	Construct an explanation based on evidence for how the availability of natural resources, the occurrence of natural hazards, and changes in climate have influenced human activity.	Google forms, short answer essay questions, tik toks
