

Power Standard	Method of Assessing this Standard
ENG3: Students will demonstrate and analyze the role of troubleshooting, research and development, invention and innovation and experimentation in problem solving.	Students are applying these standards through the creation of Arduino electronic devices. Virtual constructions are created at TinkerCAD circuits and Arduino coding.
ENG5: Students will develop the abilities to use and maintain technological products and systems.	
EL2: Students will develop the ability to use symbols, measurements and schematics to build, test and troubleshoot electronic, circuits and systems.
